

Filling head

D 40

The REX filling head is used for dosing liquid products. Depending on the product and the portion size, its portioning capacity is high thanks to the pneumatic drive. It is simple and easy to attach to the nozzle of the filling machine without the need for tools. The filling head is also available in a range of different outlet diameter for the optimum fit to any vessel.

The filling head is primarily used for the portioning of:

- Pates
- Delicatessen salads
- Sauces
- Ice creams
- Spreads
- Mayonnaise
- Matched potato

For cleaning, the filling head is easy and straightforward to take apart without the need for tools.
